

**SITE SURVEY SUMMARY SHEET
FOR
DERP-FUDS SITE NO. J09CA077100
CAMP MONTARA**

SITE NAME: Camp Montara. The site was also known as Point Montara Radar Station J-80, San Mateo County, CA.

LOCATION: The site is on the northern California coast at Half Moon Bay in San Mateo County approximately 15 miles south-southwest of San Francisco and approximately 37 miles northwest of San Jose, California (Figure 1 and 2).

SITE HISTORY: On 26 January 1943, the War Department acquired 135.00 leased acres from McNee Company (a ranch located at the site property) and 22.60 leased acres from Hibernia Savings and Loan Society (HSLs). Total acreage acquired was 157.60. 2,052.84 leased acres were scheduled to be leased from HSLs, however, that lease was cancelled. The site was primarily used as a radar site by the Army Air Force. Improvements to the site were constructed between 1943 and 1947, they included construction of two bunkers, concrete foundations for a radar tower, and presumably an electric generator and a fuel oil underground storage tank. Both leases were terminated in November 1947. Army Corps of Engineers real estate records do not indicate if restoration was required.

The site is currently owned by the State of California Department of Parks and Recreation and by several private property owners. The majority of the site is currently used as a public park.

SITE VISIT: A site visit was conducted on 05-06 February 1991 by Mr. Roger Norris and Mr. Jenn-Yih Peng, the Earth Technology Corporation. The site visit team met with Mr. Chet Bardo, State Park Ranger. Mr. Norris presented a brief discussion of the DERP-FUDS program. Mr. Bardo was identified as the most knowledgeable person regarding the former Camp Montara site area. Mr. Bardo then led the site visit team on a tour of the area. Mr. Bardo identified two DOD-built bunkers and concrete remnants of a radar tower foundation. The DOD-built structures were abandoned by the military and not beneficially used since DOD terminated occupancy of the site in 1947. The site visit team found no evidence of a former electric generator or underground storage tank.

CATEGORY OF HAZARD: BD/DR NOFA. The remaining DOD-built structures are not a structural, climbing or engulfment hazard.

PROJECT DESCRIPTION: None identified.

AVAILABLE STUDIES AND REPORTS: None identified.

PA POC: Ms. Sharon V. Bruno, CESPK-ED-M/HTW, (916) 551-1049.

FINDINGS AND DETERMINATION OF ELIGIBILITY

**CAMP MONTARA
SAN MATEO COUNTY, CALIFORNIA
SITE NO. J09CA077100**

FINDINGS OF FACT

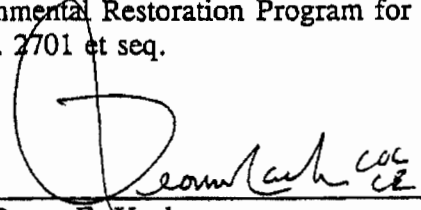

1. On 26 January 1943, the War Department acquired 135.00 leased acres from McNee Company (a ranch located at the site property) and 22.60 leased acres from Hibernia Savings & Loan Society (HSLs). Total acreage acquired was 157.60 (2,052.84 leased acres were scheduled to be leased from HSLs, however, that lease was cancelled).
2. The site was also known as Point Montara Radar Station J-80, San Mateo County, California. The site was used as a radar site by the Army Air Force. Improvements to the site were constructed between 1943 and 1947, they included two bunkers, a concrete foundation for a radar tower, and presumably an electric generator and an underground storage tank.
3. Both leases were terminated in November 1947. U.S. Army Corps of Engineers real estate record do not indicate if restoration was required. The site is currently owned by the State of California Department of Parks and Recreation and by several private property owners. The majority of the site is currently used as a public park.

DETERMINATION

Based on the foregoing findings of fact, the site has been determined to be formerly used by the DOD. Therefore, it is eligible for the Defense Environmental Restoration Program for Formerly Used Defense Sites, established under 10 U.S.C. 2701 et seq.
